

Extend your Mobile Coverage

BAGFONE

The perfect mobile communications companion for remote locations

With its built-in signal booster, BAGFONE is the perfect mobile communications companion for remote locations where cellular signal strength is weak. People living in remote areas, as well as field personnel in the mining and oil and gas industries love the BAGFONE because it is housed in a rugged, water-resistant container so that it can take a beating and still function properly to provide a clear cellular connection in environments where other cell phones won't work.

* Available with Truckfone or Voyager
